# YPAP GROUP

The group has production units in Kotka, Ikaalinen, Ypäjä, Valkeakoski and Stockfors.

Our way of doing business and build long-lasting relationships is based upon optimal product quality and reliable on-time deliveries. Our skilled organisations offer flexible and dynamic service. The consistent quality and high level of hygiene are achieved through quality systems and standards. What's more, our long tradition in paperconverting long-lasting partner customer relationships and the constant drive for improved results have given rise to environmentally friendly solutions and products.

## Products and Services

### Papersacks

Pyrollsack Oy in Kotka produces both valve and open mouth paperbags in different paper and paper/plastic combinations to meet industry packaging and logistics requirements. Paperbags have been produced in Kotka since 1953. The customers, which uses sacks that are safe for both food ingredients and dangerous materials, comprises players in the building materials industry, the sugar industry, the medical industry and the fertilizer industry

Oy Ikapaper Ab Ltd in Ikaalinen, produces papersacks and serves industry customers *with with effective flexoprinting services. Ikapaper emphasizes high flexibility.*

### Packaging and Wrapping Papers

Ypap Oy in Ypäjä offers flexoprinted packaging solutions for the food and other industries. Special products

in the range include thin hamburger wrapping papers which can be produced either as compostable BioWrap or with a standard grease and moisture barrier. Products can be supplied both as reels or sheets.

### Flexoprinting

Our experienced printers and use of state-of-the-art technology solutions ensure that we are able to successfully complete demanding jobs. What's more, given the wide range of machines the YPAP GROUP possesses, we will find solutions to most packaging needs.

### FlowPap Flowpack Laminates

Ypap Oy has developed a unique flowpack laminate which allows fresh food products to be packed in an efficient and hygienic way. The combination of paper and film also makes high barrier solutions possible. The packaging also can be fitted with a customised window and printing.

### Technical Coatings

At Ypap Oy 's production unit in Stockfors we coat papers and cartons with water-based coatings. The technology gives

excellent scope to enhance barrier properties or to colour the paper using a virtually pinhole-free solution. The vast range of water-based coatings can also be put to interesting uses in many industrial sectors.

### Services

Given the extensive range of converting machines, we can offer sheeting, rewinding, slitting, printing and coating services. We also able to offer packaging and logistics services.

### Building Papers

The long-lasting PAAVO product range maintains the hygienic and environmentally friendly building tradition of Finland. The PAAVO product range offers wind barriers, moisture barriers, under roof coverings and a wide range of protection products.

### Drafting Paper

TT-Paperi Oy in Valkeakoski produces a broad range of drafting papers for the textile industry. They also offer slitting and small-scale rewinding services.
